ABSTRACT

Federal programs of assistance to community development are presented in this guide for community leaders. Individual programs are described in summary form and arranged alphabetically under chapter headings. Programs are listed in the following areas: (1) business stimulation, jobs creation, and income expansion; (2) buildings, installations, and the physical components of a community; (3) community operations, public assistance, and citizen activities; and (4) designing future development with realistic priorities. Federal departments and agencies administering domestic assistance programs available to rural areas are listed. (PS)

Preface to Second Edition

Enactment of the Agriculture Act of 1970 established revitalization of rural America as a top priority national policy.

Title IX (Section 901(a)) of the Agriculture Act of 1970 states:

> "The Congress commits itself to a sound balance between rural and urban America. The Congress considers this balance so essential to the peace, prosperity, and welfare of all our citizens that the highest priority must be given to the revitalization and development of rural areas."

In addition to this strong commitment to highest priority for the rural development component of a sound rural-urban balance, Title IX requires several annual reports from the Executive branch in regard to existing Federal programs which are supposed to benefit rural America.

The purpose of requiring these reports was to give Congress an honest assessment of how existing Federal programs are working in rural America and to provide ideas for how these programs can be improved. Wherever possible, Congress should built on existing programs to promote the revitalization of rural America, but in some cases it will be necessary to devise new programs.

As Chairman of the Rural Development Subcommittee of the Senate Committee on Agriculture and Forestry, Senator Humphrey has conducted exhaustive hearings both around the country and in Washington. His hearings have focused on a number of issues and they have revealed a great deal about the deficiencies and shortcomings of our existing Federal programs.

However, a recurring criticism that appeared through these hearings was not only the failure of existing Federal programs to reach fairly into rural areas, but also the inability of citizens to understand and take advantage of those Federal aid programs now available. The small town mayor or city councilman, the local banker, and other rural leaders have a particularly difficult time in comprehending the complex Federal programs which are available to their areas. Unlike big city officials, they have no trained professional staff to go after Federal funds.

In looking over the government publications now available, the Subcommittee on Rural Development did not find any publication which provides a readable, understandable guide to Federal programs for rural development. However, Senator Humphrey and I were impressed with a book published by the Independent Bankers Association of America entitled "Guide to Federal Programs for Rural Development". This book, compiled by John A. and Sue Baker, provides an easy understanding of rural development programs rather than a complex catalog written in bureaucratic style.

Senator Humphrey discussed republication of the "Guide" with the president of the Independent Bankers Association, Mr. Donald M. Carlson, who has given permission to print this book as a Senate document. I was delighted to offer a Senate Resolution to have this book printed as a Senate document with 12,000 copies to be available to the Senate Committee on Agriculture and Forestry.

In keeping with our agreement with the Independent Bankers Association of America, the staff of the Committee has updated and revised the original publication.

Of course, it is virtually impossible to have all programs in a compilation of this sort completely current as of the date of printing. Therefore, the Committee would appreciate being informed of needed corrections and other suggested improvements in this guide.

HERMAN E. TALMADGE,
Chairman.

and Forestry.

Preface of Original Edition

Bankers are natural community leaders. The service a bank provides is the economic lifeblood of the community, and the future of the independent bank depends upon a healthy local economy.

Others in the community who are interested in local development naturally turn for assistance to their bank, which is the depository of community funds and the primary source of credit.

That's why the Independent Bankers Association of America had the community banker specifically in mind when it conceived the idea for this GUIDE TO FEDERAL PROGRAMS FOR RURAL DEVELOPMENT. This is a unique volume—a handbook to lead you through the wilderness of federal assistance programs that are available for the development of your community.

Big cities employ a fulltime staff of experts whose only job is to uncover sources of federal money. This GUIDE gives the rural banker and other community leaders similar expertise.

The IBAA commissioned a uniquely qualified Washington couple—John and Sue Baker—to slice through the bureaucratic encrustations and bring to light some 494 programs available to your community. Mr. Baker is a former Assistant Secretary of Agriculture and is now a consultant on rural development through his firm, Community Development Services in Arlington, Virginia. Mrs. Baker is a writer and former newspaperwoman.

The GUIDE is an outgrowth of the nationwide effort of the IBAA Agriculture-Rural America Committee to promote rural community development. The Committee discovered that no functional guide to federal programs existed which would tell the reader in layman's terms not only what programs are available, but also how to go after them.

The book has been divided into sections with colored paper stock for easy reference and is completely indexed and cross-referenced. An Appendix lists the government agencies (and their regional addresses) that provide rural development assistance. The contents will be updated from time to time as new programs are funded.

The IBAA hopes that this GUIDE TO FEDERAL PROGRAMS FOR RURAL DEVELOPMENT will help make every independent bank a local clearing house for community development information. In the process, we also hope that this volume will make a significant contribution to the revitalization of rural America.

Considering the enormous social and economic problems resulting from over-population in the cities, rural community development is vitally important not just to rural residents, but to all Americans.

Introduction to Original Edition

This GUIDE TO FEDERAL PROGRAMS FOR RURAL DEVELOPMENT has been prepared as a reference handbook for independent bankers and other local leaders in communities across the land. It is dedicated to the future of economic opportunity and the quality of life in rural America.

Development means profitable business, expanding job opportunities, greater capital investment higher personal incomes, modern community facilities, and a full range of public services. In rural areas, the goal is to develop sustained economic growth, while maintaining the unique character and style that is the tradition of town and country living.

Rural development depends on national and State commitment; but there is no magic formula to guarantee development for the individual community, except the inspiration of local leadership and the determination of local citizens to develop their own area. Private business and public agencies share the responsibility and the opportunity to create and promote this type of development. Success depends on the vision to set attainable goals, the resolution to work toward planned objectives, and a high degree of cooperation among all the diverse elements within a given area.

Many aspects of local development are related to similar efforts in neighboring communities, and to broader development programs within a larger area. District Planning and Development Agencies, Councils of Government, or similar organizations have been created to provide coordination and mutual assistance for both the planning and the action programs of participating jurisdictions.

Local development programs are also highly dependent upon State government for legislative authority, technical assistance, and financial aid. Throughout this handbook, reference is made to State (or State-authorized) programs which are financed to some degree by the Federal government through formula or project grants.

In addition to local and State development programs, forty-one different Federal Departments and agencies offer some type of financial or technical aid to localities outside of the highly urbanized sections of the country. Many of these programs are specifically designed to meet rural needs; but most are general domestic assistance programs for which both metropolitan and non-metropolitan communities are eligible. To tap these resources and bring proportional benefits to less-densely populated areas, requires broad knowledge of the Federal programs as well as special alertness and effort in making applications.

Historically, the United States Department of Agriculture has taken a leadership role in rural development. Within USDA, these programs are operated by sixteen different subdivisions—such as the Extension Service, Farmers Home Administration, Rural Electrification Administration, Soil Conservation Service, and others.

Dr. T. K. Cowden, Assistant Secretary of Agriculture, is responsible for the overall coordination and planning for rural development within the Department of Agriculture, and for rural development liaison with other Federal Departments and agencies. Dr. Cowden and his associates have given invaluable encouragement and assistance to the preparation of this handbook.

Eight other Cabinet-level Departments, three Executive Offices, sixteen Independent Agencies, and twelve Special Commissions also sponsor and operate domestic assistance programs that are available to rural areas—either nationwide, or in designated geographic areas.

These administrative separations are not part of the overall view of Federal assistance for rural development, and the bureaucratic distinctions are often a source of frustration and confusion to local officials and private citizens who are starting out to seek assistance.

To make this GUIDE useful as an introduction to Federal assistance and as a "locator" of specific programs, we have departed from the usual organizational structure of government catalogs and manuals—except for listings in the Appendix.

There are four general categories covered in this Guide: Part I—Business, Industry and Agriculture; Part II—Community Facilities; Part III—Community Functions and Services; Part IV—Planning. Each category (or section) is printed on a different colored paper stock in order to make the guide-book as "easy-to-use" as possible.

Each Chapter in this handbook is devoted to a specific community development function for which there are related or matching Federal assistance programs. The Chapters are intended to parallel "spheres of interest" at the local level; and each Chapter includes the government-wide approach to a particular local problem. This type of organization brings the resources of several different Departments and agencies together under one Chapter heading. All programs with similar objectives will be found side-by-side, regardless of how they are separated organizationally at the Federal level for administrative or budget purposes.

Individual programs are described in summary form, and arranged alphabetically under Chapter headings. Cross references are used to avoid repetition.

In addition to the "who, what, where, and how" for each program, *Program Literature* has been selected and listed for the user of this GUIDE who desires more detailed information about any particular program.

Technical regulations and procedures governing Federal programs are too complex and too voluminous to be included in this handbook. These materials are available from the *Information Contacts* or the *Headquarters Offices* given for each program. (The addresses of agencies, names of administrators, and telephone numbers are accurate as of publication date.)

Under *Special Comments* figures are given for program obligations during fiscal year 1969, and estimates for fiscal year 1970. These "obligations" figures give a general idea of the size and nationwide impact of the particular program.

Factual information for this GUIDE has been obtained from the following sources:

1. "Catalog of Federal Domestic Assistance." 1970 Edition. Compiled for the Executive Office of the President by the Office of Economic Opportunity.
2. "Federal Programs Available to Assist Rural America." 1968 Department of Agriculture Special Handbook.
3. "Federal Programs for Individual Community Advancement." U.S. Department of Agriculture Handbook No. 312.
4. "1969 Listing of Operating Federal Assistance Programs Compiled During the Roth Study." House of Representatives Document No. 91–177.
5. "United States Government Organization Manual 1969–70." Office of the Federal Register, National Archives and Records Service, General Services Administration.
6. Various publications of the U.S. Government. (Listed individually under Program Headings)

The purpose of this GUIDE is to organize and summarize all possible Federal assistance for rural development. No attempt has been made to evaluate the effectiveness of these programs.

It should be noted that funds for the operation of Federal programs must be authorized by legislation and appropriated annually by the Congress. For many of the programs, the full expenditure of appropriated funds is left to the discretion of the Executive Branch. Within the legislative guidelines, the Executive Branch also determines the emphasis to be placed on programs of local assistance, the degree of "outreach" to rural areas, and the effectiveness of the delivery systems.

To keep abreast of legislative and administrative changes in these programs, supplements for this GUIDE will be issued from time to time.

We sincerely hope that the functional approach of this GUIDE will help to clarify the role of the Federal government in rural development, and that this handbook will be of practical assistance in building better communities for tomorrow.

The Federal Government enters into thousands of supply and construction contracts each year. These contracts may be executed at the headquarters office of Federal departments or Federal agencies in Washington, D.C., or at agency field offices located throughout the United States.

Assistance to private business firms is available at the regional business service centers of the General Services Administration (see appendix for locations). These service centers serve as a central source of information on doing business with the Government in each geographic area of the country.

Specialized Government publications relating to each type of business operation are listed under the separate program headings in this chapter. Two publications of general business interest are:

(1) "Doing Business With the Federal Government." (Order from General Services Administration, Washington, D.C. 20405. No charge.)

(2) "Commerce Business Daily." (Order from Department of Commerce, Washington, D.C. 20230. Annual subscription, $25 plus $30.25 extra for airmail.)

● CONSTRUCTION CONTRACTS

Invitations to bid are circulated to the construction industry through prescribed channels.

Contractors may request to have their names placed on bidders' lists for the area in which they are interested in work.

CONSTRUCTION CONTRACTING OPPORTUNITIES

Contact regional offices of General Services Administration. (See appendix for location of offices.)

"Commerce Business Daily". (Order from Department of Commerce, Washington, D.C. 20230. Annual subscription, $25.)

● DESIGN CONTRACTS

For information on contract opportunities and the procedures used in selecting architects and engineers:

Contact regional office of General Services Administration (See appendix for locations).

Priority is given to architects and engineers within the general locality of the projects.

PROGRAM LITERATURE

"Public Buildings Design and Construction". (Available from the General Services Administration, Washington, D.C. 20405.)

● FEDERAL PROCUREMENT (GENERAL)

Purchases for items in common use throughout the Government are made by the General Services Administration.

Items included are (1) furniture, (2) office supplies and equipment, (3) tools, (4) paint, (5) office machines, (6) cleaning supplies, (7) plumbing and heating equipment, (8) vehicles, (9) firefighting equipment, and (10) many others.

Inquiries and applications are handled through the regional director of business affairs, at the nearest General Services Administration regional officer. (See appendix for locations.)

• 502 PROGRAM (LOCAL DEVELOPMENT COMPANY)

Small Business Administration

ASSISTANCE AVAILABLE

Direct loans and repayable advances; guaranteed and insured loans. Offers a local development company an opportunity to assist in the planned economic growth of a community.

Promotes and assists the growth and development of small business concerns in the area.

Small Business Administration participates with banks, insurance companies, pension and similar funds, and State agencies in making loans to local development companies for financing local projects.

SBA may lend up to $350,000 for each small business to be assisted by a local development company project. Terms up to 25 years. Loan proceeds are used solely for plant construction, conversion, or expansion (including the purchase of land, buildings, equipment, and machinery). Not for working capital.

ELIGIBILITY

Group of 25 or more local residents or businessmen. Organized as a profit or nonprofit organization under general State corporation statute.

APPLICATION PROCESS

Coordinate with other Federal agencies, State lending authorities, and private institutions participating in financing the project cost. Submit SBA form 502.

SPECIAL COMMENTS

Local development company must raise a share of the total project cost. Usually 10 to 20 percent—with the lower amounts for smaller communities and lower income areas.

Private lending institutions are encouraged to join the Small Business Administration in financing balance of project cost. Type of participation may be (1) guaranty plan, (2) regular participation plan, or (3) first mortgage plan.

• REHABILITATION LOANS

Community Development
Department of Housing and Urban Development

ASSISTANCE AVAILABLE

Loans with terms up to 20 years for the improvement of residential and nonresidential properties.

In areas of federally assisted urban renewal programs, or areas of federally assisted code enforcement.

Also in areas certified by the local government as containing a substantial number of structures in need of repairs, and definitely scheduled for rehabilitation or code enforcement within a reasonable time.

Also in areas determined to be uninsurable because of physical hazards (after an inspection pursuant to a statewide property insurance plan approved by HUD under the program of property insurance for riot-affected areas).

ELIGIBILITY

Owners of property or tenants of nonresidential property whose leases will not expire during the loan term. Restricted to low-income applicants.

APPLICATION PROCESS

Through local public body administering the urban renewal or code enforcement project.

Or contact regional office of Department of Housing and Urban Development. (See appendix.)

SPECIAL COMMENTS

Residential property loans not to exceed $10,000 ($14,500 in high-cost areas) per dwelling unit, or the actual cost of rehabilitation, whichever is less.

Nonresidential property loans may not exceed the lesser of: (1) $50,000; (2) cost of rehabilitation. Other limitations.

● RENT SUPPLEMENTS

Housing Production and Mortgage Credit/FHA
Department of Housing and Urban Development

ASSISTANCE AVAILABLE

Federal rent supplement payments are made to owners of certain private housing projects.

Housing must be financed under certain HUD programs; or under State or local programs that provide loans, loan insurance, or tax abatements—if the projects are approved for rent supplement before completion of construction or rehabilitation.

ELIGIBILITY

Tenants whose incomes fall within prescribed limits if they also qualify in one of the following ways: (1) are elderly or handicapped, or have an elderly or handicapped wife or husband; (2) are displaced by governmental action; (3) are occupants of substandard housing; (4) are present or former occupants of dwellings damaged or destroyed by a natural disaster.

Housing owners eligible for contracts to receive rent supplements are nonprofit, cooperative, or limited-divided organizations.

APPLICATION PROCESS

Tenants apply to owner of the housing project.

Owners apply for rent supplement contracts at regional offices of Department of Housing and Urban Development. (See appendix.)

SPECIAL COMMENTS

Rent supplement payment for a tenant amounts to the difference between 25 percent of his income and the fair market rental for the unit he occupies.

Rent supplement is adjusted as tenant's income changes. He may continue to live in the same unit without rent supplement if his income rises to the point where he can pay the full rent.

● EXPERIMENTAL HOUSING (MORTGAGE INSURANCE)

Housing Production and Mortgage Credit/FHA
Department of Housing and Urban Development

ASSISTANCE AVAILABLE

Mortgages are insured by the Federal Housing Administration on individual homes and on multifamily housing projects that incorporate new or untried construction concepts aimed at reducing housing costs, raising living standards, and improving neighborhood design.

This program is designed to speed the development of new concepts by reducing the risks involved in underwriting mortgages on housing incorporating certain experimental features.

Mortgages insured under this program may be used to finance projects for large-scale testing and use of new technologies in developing housing for lower income families on Federal or State land made available for the purpose.

HUD will approve up to five plans for such projects, involving the construction of at least 1,000 dwelling units a year over a 5-year period for each of the various types of technologies proposed in the plans approved.

ELIGIBILITY

Sponsors able to prove that the proposed property is an acceptable risk for testing advance housing design or experimental property standards.

APPLICATION PROCESS

Submit proposals for experimental features to the local FHA insuring office.

Applications for mortgages are made to lending institutions approved by FHA as mortgagees.

AUTHORIZING STATUTE

Section 233, National Housing Act (Public Law 73–479), as added by the Housing Act of 1961 (Public Law 87–70) and as amended.

• PLANNING INVESTIGATIONS AND COORDINATION

Water Resources Council

Multiple purpose water development planning investigations are undertaken jointly by the Federal departments and State agencies, under the coordination of the Water Resources Council.

A complex and widespread system of consultation with every interest in water development is followed to assure that the proposed plan has been considered from every possible point of view before it is recommended for approval.

Most water development projects proposed for construction with Federal or State assistance must be incorporated in or consistent with these coordinated State and river basin water development plans, before they can be funded.

HEADQUARTERS OFFICE

W. Don Maughan, Director
Water Resources Council
Washington, D.C. 20005
Telephone: (202) 382–6104

AUTHORIZING STATUTE

Water Resources Planning Act; Public Law 89–80; 42 U.S.C. 1962.

REGULATION OF PRIVATE DEVELOPMENT

Federal Power Commission

Licenses and permits for construction and operation of private water development projects are issued by the Federal Power Commission.

The planning for private development is coordinated with water development planning procedures of other water development interests.

A determination is made before issuance of a permit, that the proposed development is best adapted to the comprehensive river basin plan for the basin involved.

FOR MORE DETAILS

See "Electric Power," page 192 this section.

● RIVER BASIN COMMISSIONS (PLANNING)

Water Resources Council

Upon application of a majority of Governors of States within a delineated river basin, the President is authorized to establish a Federal-State River Basin Commission.

The Chairman of the Commission is appointed by the President. The Federal Government pays the salary of the Chairman, and 50 percent of the cost of the Commission staff.

Such Commissions have been established as follows:

Great Lakes Basin Commission
Room 4102 IST Building
2200 North Campus Boulevard
Ann Arbor, Mich.

New England River Basin Commission
Room 1615
Post Office and Courthouse Building
Boston, Mass. 02109

Post Office Box 908
1 Columbia River
Vancouver, Wash. 98660

Souris-Red-Rainy River Basins Commission
Suite 6, Professional Building
Holiday Mall
Moorhead, Minn. 56560

When established, the River Basin Commission is empowered to coordinate all water development planning within its geographic territory. The Commission prepares and keeps up to date a comprehensive water and related land resource plan for the basin—involving Federal, State, local, and private interests in water development.

AUTHORIZING STATUTE

Title II, Water Resources Planning Act; Public Law 89-80

● WORKABLE PROGRAM FOR COMMUNITY IMPROVEMENT

Metropolitan Planning and Development
Department of Housing and Urban Development

An official plan of community action is prerequisite for certain Federal aids to the community.

HUD programs requiring a workable program are: (1) grants for concentrated code enforcement and for demolition of unsound structures; (2) mortgage insurance for private housing financed under FHA's below-market-interest rate provisions and under its special urban renewal housing program; (3) loans and annual contributions for public low-rent housing; (4) loans and grants for rehabilitation projects; (5) loans and grants for urban renewal; (6) loans and grants for neighborhood renewal; and (7) grants for interim renewal.

The workable program must involve public and private resources to eliminate slums, prevent blight, and foster local development.

ESSENTIAL ELEMENTS OF A WORKABLE PROGRAM

(1) effective codes and code enforcement,
(2) comprehensive planning and programing,
(3) provisions for housing and relocation,
(4) provision for citizen involvement.

The plan must be certified by the Department of Housing and Urban Development as a workable program for community development. Initial certification is for 2 years. Recertification every 2 years is based on review of progress submitted to HUD by the community.

● HOUSING CODE ENFORCEMENT GRANTS

Housing Assistance
Department of Housing and Urban Development

ASSISTANCE AVAILABLE

Financial and technical assistance (in the form of project grants) for planning and execution of effective code enforcement programs in selected areas where at least 20 percent of the buildings have code violations. The assistance is intended to prevent blight and restore the stability of sound neighborhoods before mass rehabilitation or clearance becomes necessary.

For communities under 50,000 population, grants are up to 75 percent of eligible costs for the planning and execution of the code enforcement program, and the provision of certain street improvements.

Direct 3-percent interest loans and grants up to $3,500 are available to residents of the selected areas. Eligible relocation costs are also provided for persons displaced as a result of code enforcement.

ELIGIBILITY

Cities, counties, other municipalities, and Indian reservations, with statutory authority to enforce a comprehensive system of codes regulating the use and construction of private properties within the community.

Applicant must have a certified workable program for community improvement.

Applicant must be carrying out an effective program of code enforcement.

Applicant must agree to maintain normal levels of expenditures of code enforcement, exclusive of that required for this program.

Applicant must agree to provide relocation assistance to all those displaced by program activities.

Applicant must provide, at local expense, all those public facilities necessary to accomplish the purpose of the program but which are not eligible project costs.

APPLICATION PROCESS

Contact regional offices, Department of Housing and Urban Development.

SPECIAL COMMENTS

Commitments for fiscal year 1971 were $53 million; fiscal year 1972—$55 million (estimate). There were 37 projects in fiscal year 1971.
